SUMMARY

Frontend Developer with 4 years of experience building scalable React.js and Next.js applications. Experienced in TypeScript, Redux Toolkit, REST API integration, PostgreSQL, and performance optimization. Skilled in building high-traffic enterprise applications and AI-powered web products.

TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, Tailwind CSS, jQuery, shadcn/ui

Database & ORM: MySQL, PostgreSQL, Prisma ORM

Tools & Platforms: Git, GitHub, VS Code, Postman, REST APIs, Claude, Cursor, Vercel

Concepts: Responsive Web Design, Performance Optimization, Component-based Architecture, Agile/Scrum

EXPERIENCE

Front End Developer

Feb 2026 – March 2026

SD Innovations Private Ltd

Chennai, India

- Developed and maintained a responsive conference/event management white-labeled application using React.js and Next.js.
- Built 10+ reusable UI components using shadcn/ui and Tailwind CSS for intricate event schedules, speaker listings, and seamless registration flows.
- Integrated frontend views with PostgreSQL via Prisma ORM, ensuring fluid data delivery and optimizing end-to-end application performance for a live-streamed conference use case.
- Tech Stack:** React.js, Next.js, TypeScript, shadcn/ui, PostgreSQL, Prisma ORM

Software Developer

Aug 2021 – May 2025

Sify Technologies Limited

Chennai, India

- Developed and optimized high-traffic React.js user interfaces for enterprise candidate registration, results, and call-letter portals, heavily prioritizing usability and speed.
- Built dynamic, robustly validated forms and closely integrated frontend components with REST APIs and SQL-based backend services.
- Improved page load performance by 35% utilizing strategic code splitting, lazy loading, and responsive design paradigms across diverse multi-device environments.
- Designed and implemented an internal task management platform enabling real-time operation tracking, task creation, and cross-team collaboration.
- Tech Stack:** React.js, TypeScript, SQL, HTML5, CSS3

PROJECTS

FormCraft – Schema-Driven Data Automation Platform | *React.js, Next.js, TypeScript, Node.js, PostgreSQL*

- Developed a full-stack data automation platform leveraging React.js and TypeScript to transform complex, unstructured Excel inputs into validated JSON schemas via dynamic form-builders.
- Built a highly responsive frontend architecture using Tailwind CSS, featuring real-time state synchronization and modular, component-based view layouts to handle large-scale data manipulation smoothly.
- Implemented a robust backend utilizing Node.js and PostgreSQL, optimizing database queries and schema relations to effortlessly process 10K+ daily API requests with sub-100ms latency.
- Integrated modular REST APIs to manage complex data workflows, ensuring synchronous frontend-backend transitions and cross-device interface stability.

Gizmo Application | *React.js, Next.js, HTML, CSS, TypeScript*

- Led the front-end architecture of the Gizmo application and leveraged Next.js Server-Side Rendering (SSR) to build highly modular, SEO-optimized view layouts, improving initial page load time.
- Collaborated tightly with backend engineering teams to ensure synchronous REST API integration and smooth client-side state transitions.

EDUCATION

Sri Sairam Engineering College , Chennai, India

Bachelor of Engineering, Computer Science

8.4 cgpa

2017 – 2021
